Detail-oriented Web Developer with diverse, human-centric work experiences and passion for front end development. Possesses an aptitude for conceptualizing and delivering practical, user-friendly web applications focused on spreading positivity, such as a mental health app and tourism app. Thrives on cross-disciplinary collaboration and, with innate capacity for pair programming, seeking to become an impactful member of a harmonious development team.

Skills

Front-end: ReactJS • HTML • CSS • AJAX • jQuery • UI Frameworks (Material UI, Bootstrap) | **Back-end:** NodeJS • JavaScript (ES6) • ExpressJS • MongoDB • MySQL | **Software:** Heroku • Figma • Trello • Webpack • Github • NPM | **Other:** AGILE development • Project planning & management • Qualitative & quantitative research practices • Information architecture & flow • User need identification • Proto-personas • Bilingual: Korean & English

Projects

Chirrup! | <https://tinyurl.com/ChirrupReadMe> | <https://chirrup-app.herokuapp.com/> | Front end

- An anonymous mood-logging mental health app through which users give and receive positive words of encouragement
- Implemented Figma wireframe UI designs and connected elements to back-end routes to display data
- ReactJS, NodeJS, ExpressJS, MongoDB, Material-UI

Google Book Search | <https://tinyurl.com/jkim-booksearch-readme> | <https://tinyurl.com/jkim-googlebooksearch> | Full stack

- A book search and save app utilizing the Google Books API
- Full Stack MERN application

My Food Diary | https://github.com/jiyoon9886/food_diaries | <https://food-diaries.herokuapp.com/> | Back end

- A meal tracking app that allows users to record favorite meals according to restaurants visited
- Implemented Passport for authentication and wrote user data schemas, routes, and API route tests
- HTML, CSS, Express, Javascript, jQuery, MySQL, Sequelize

Touristee | <https://tinyurl.com/TouristeeReadMe> | <https://tinyurl.com/touristee> | Front end

- A tourism app that suggests restaurants and activities/points of interest based on proximity
- As part of the front-end team, designed and created the app's home page
- HTML, CSS, JavaScript, jQuery
