Detail-oriented Web Developer with a diverse, human-centric work experiences. Possesses an aptitude for conceptualizing and delivering user-friendly websites and applications. Experienced in developing fully functional practical projects focused on spreading positivity, such as a mental health app and tourism app. Armed with an understanding of pair programming and working harmoniously as part of a development team.

Technical Skills

- Front-end: ReactJS • HTML • CSS • AJAX • jQuery
- Back-end: NodeJS • JavaScript • ExpressJS • MongoDB • MySQL
- Other: Webpack • Git • Jest • ES6

Projects

Chirrup! | https://github.com/jiyoon9886/madagascar | Deployed June, 2020   Front-end

- A mental health application in which users log their emotions or thoughts as personal records or anonymous, public posts to which other users can reply to with positive words of encouragement.
- Created the landing, login, sign up, and dashboard pages adhering to Figma prototype and connected elements to back-end routes to display data
- ReactJS, NodeJS, ExpressJS, MongoDB, Material-UI

My Food Diary | https://github.com/jiyoon9886/food_diaries | Deployed May, 2020   Back-end

- A meal tracking application that allows users to log their favorite meals according to restaurants visited
- Used Passport for authentication and wrote schemas for user data, routes, and tests for API routes
- HTML, CSS, Express, Javascript, jQuery, MySQL, Sequelize

Touristee | https://github.com/jiyoon9886/touristee | Deployed April, 2020   Front-end

- An application that provides users with restaurant and activity/points of interest suggestions based on proximity
- As part of the front-end team, designed and created the app's home page
- HTML, CSS, JavaScript, jQuery
